Configuration of DHCP in Packet Tracer

Aim: To Configure DHCP in Packet Tracer

Software: Packet Tracer (End devices, Hub, Connector)

Procedure

1. Launch Cisco Packet Tracer.
2. Add necessary network devices to your topology.
3. Configure the DHCP Server.
4. Configure the Switch.
5. Configure the DHCP switch.
6. Start the Simulation.
7. Verify DHCP operation.

Result: Therefore the configuration for DHCP has been successfully executed using Packet tracer.
