

Experiment - 21

Implementation of ZOT device in networking

Aim: To implement an IOT device in networking using Cisco Packet tracer.

Software Packet Tracer, Hubs, Connectors

Procedure Open Cisco Packet tracer & create a new project

1. Open Cisco Packet tracer & create a new project
2. Connect the router to internet
3. Add an IOT device to network.
4. Connect the IOT device to router using Ethernet
5. Configure the IOT device
6. Test the connectivity of IOT device
7. Also configure the router & cloud device.

Result: Thus an IOT device in networking implemented using Cisco Packet tracer successfully.
